PERSONAL STATEMENT

Cloud Solutions Architect and AI/ML Engineer with over seven years of experience designing and delivering enterprise-grade systems across cloud, integration, and artificial intelligence domains. Specialized in cloud-native architecture on AWS — spanning EKS, S3, API Gateway, and Cognito — with a strong track record in modernizing legacy stacks and building scalable, secure integration layers. Hands-on practitioner in applied AI: from deploying production RAG pipelines and local LLM inference with GGUF and llama.cpp, to building AI-powered automation for incident management and code migration.

SKILLS & TECHNOLOGIES

Passion 🚀 | Full Stack Software Developer | Web and Mobile applications | JavaScript | bash/shell/scripting | NodeJs | GenAI / LLM / RAG / CAG | React / Next.js | AWS (EKS, S3, EC2, IAM, API Gateway, Cognito) | Technology Architect | Blockchain Management | Ollama / Local LLMs | AI Agent Orchestration | llama.cpp / GGUF / local inference | Python / PyTorch | Azure Cloud | Kubernetes / Docker / Helm | Java Spring Boot / Quarkus | TensorFlow / PyTorch | SAP / TIBCO / ERP Integration | Hyperledger Besu / Solidity / IPFS | CI/CD / DevOps / GitOps | Observability | InfluxDB

EXPERIENCE

Cloud Solutions Architect — Application Stack Modernization (MiTur)
Apr 2025 – Ongoing
Accenture — Ministero del Turismo
- Leading the porting of an existing enterprise application stack from TIBCO BusinessWorks 6 (BW6) to Java Spring Boot microservices.
- Designed and implemented cloud-native architecture on AWS (S3, API Gateway, EKS).
- Leveraged AI-assisted code analysis tools for reverse-engineering legacy patterns.

Cloud Solutions Architect — Mobile & Backend Federation (FiberCop)
Apr 2025 – Ongoing
Accenture — FiberCop
- Architected a secure connectivity layer between mobile applications and heterogeneous backend systems using AWS API Gateway and Cognito.
- Implemented OAuth2/JWT-based token brokering for seamless cross-platform authentication without backend modifications.

Cloud Solutions Architect — Cloud Architecture Design & Migration (Dottor Max)
Apr 2025 – Ongoing
Accenture — Dottor Max
- Designed end-to-end cloud architecture (RDS, S3, Lambda, ECS) for a pharmacy management platform.
- Produced detailed blueprints and defined a phased migration strategy from on-premises to AWS.

AI/ML Engineer — Local LLM Products with GGUF & Llama.cpp
2024 – Ongoing
Accenture
- Developed internal AI products using quantized language models (GGUF) via llama.cpp for on-premise inference.
- Implemented RAG pipelines and modular pipelines integrating vector stores (FAISS, ChromaDB).

AI/ML Engineer — Incident Management Automation (ENEL)
2024 – Ongoing
Accenture — ENEL
- Designed an AI framework for autonomous incident detection and triage.
- Integrated AI models with InfluxDB and Grafana to reduce MTTR and trigger automated runbooks.

Cloud Solutions Architect — Data Orchestration for EUDR Compliance
Jan 2025 – Ongoing
Accenture
- Designed a cloud-native data orchestration framework integrated with TRACEMARK for raw material traceability.
- Established secure ERP integrations (SAP, Postgres) with AWS S3.

AI/ML Engineer — LLM and Generative AI
Mar 2024 – Present
Accenture
- Research and implementation of LLMs using TensorFlow, PyTorch, and GGUF quantization techniques.
- Developed RAG (Retrieval-Augmented Generation) solutions to enhance accuracy and context-awareness.

Software Architect and Team Lead
Feb 2024 – Ongoing
Accenture
- Lead and manage development teams for critical projects, including the EUDR Regulation Compliance project, ensuring timely and quality delivery.
- Deploy custom blockchain networks with Hyperledger Besu, develop Solidity smart contracts for NFT management, and create backend services in Node.js and Quarkus for blockchain and data interactions.
- Develop user interfaces with React and Next.js, integrating seamlessly with enterprise systems (SAP, TIBCO) and AWS for secure and efficient data handling.
- Responsible for DevOps practices, using Docker, Docker Compose, and Kubernetes for container management and orchestration, and managing CI/CD pipelines with Bamboo.
- Oversee AWS environment configurations (IAM, EC2, EKS) to optimize cloud-native applications, while applying cryptographic techniques for security and data integrity.
- Collaborate with business departments and clients to define requirements, design solutions, and implement Agile methodologies as a *certified* Scrum Developer.
- Document processes, release notes, and technical guides in Confluence for knowledge sharing and continuity.

DevOps & Observability Specialist — Active Monitoring with InfluxDB
Mar 2024 – Apr 2024
Accenture
- Architected an active monitoring system using InfluxDB and Python (pandas, influxdb_client) for metrics visualization.
- Containerized and orchestrated microservices with Docker and Kubernetes on AWS.

Blockchain Engineer & DevOps Specialist
Mar 2023 – Ongoing
Accenture
- Deployed custom blockchain networks using Hyperledger Besu.
- Wrote Solidity smart contracts for NFT management and developed backend services in Node.js and Java (Quarkus).

Application Development Senior Analyst
Jan 2020 – Feb 2023
Accenture — ENEL
- Developed web portals and energy market platforms for ENEL Italy and North America.
- Full-stack development with React and Java Spring Boot (microservices) on AWS.
- Acted as Scrum Master.

Application Development Analyst
Apr 2017 – Jan 2020
Accenture — ENEL / ENEL Green Power
- Analysis and development of energy market platforms.
- Led the architectural migration from on-premises to AWS EC2 using SAS and J2EE technology stacks.

EDUCATION

Blockchain Management School — 2021
Master Blockchain Technology & Management

Accenture University — 2021
Master Technology Architect (Fundamentals)

Università degli Studi di L'Aquila (DISIM) — 2016
Bachelor's Degree in Computer Science

CERTIFICATIONS

CKAD Certification — Ongoing
Professional Scrum Master™ Certification — Ongoing
AWS Certified Solutions Architect Associate — Sep 2022
DevOps Foundation — Dec 2021
Accenture Master Technology Architect (Fundamentals) — May 2021
Amazon AWS Cloud Practitioner Certification — Apr 2021
Microsoft Azure Fundamentals [AZ900] — Nov 2020
Professional Scrum Developer I [PSD1] — Jul 2019
Kubernetes — Accenture University + Udemy — Feb 2020
React — Accenture University + Udemy — Jan 2020
Docker — Accenture University + Udemy — Nov 2019
Python — Accenture University + Udemy — Feb 2018
